## TRANS-LIFT MOP, mobile order picker, TL 250 AC

With MOP Light, TL 250 TRANS-LIFT introduces a light, Danish produced and low-priced model. The vehicle is constructed on the basis of the vehicles with which TRANS-LIFT has more than 30 years of experience. The speed is transistor regulated and there is a choice between 3 different reduction gearboxes for maximum speed of up to 18 km/h.

The transistor regulation is multi-adjustable with optional parameters.

The total width can be 700 mm, or as desired, although minimum 580 mm.

The vehicle can be assembled with computer equipment, extra platform etc.

Designed for fast and efficient order picking or for moving supplies or mail - everywhere a steady and maneuverable vehicle is needed.

Standard models or "custom made" to suit requirements.

### Technical specifications:

*Engine:* 24V AC, 1,2kW

Continuously variable transmission.

Electric "dead man's" handle.

*Batteries:* 24V, 105ahp/5h or as desired, e.g. sealed and maintenance-free truck batteries (gel technology).

*Wheels:* 300mm 6pr gas rubber wheels alternatively semi massive, puncture-free Gumasol wheels.

### Transmission:

Maintenance-free speed reducing gearbox.

Maintenance-free drive-belt. Differential drives and brakes on both rear wheels. Noiseless driving.

### Measures:

Width, e.g.: 700 mm

Length, e.g.: 1600 mm

Weight: 230 kg

Loading capacity: 500 kg

Speed: up to 18 km/h
