## TRANS-LIFT TRACTOR, model TL 500AC

**TRANS-LIFT** electric tractors are Danish made and developed for driving in places with little space. The specially developed, sharp turning steering gear makes the tractors as maneuverable as similar 3-wheeled vehicles, but much more stable.

**TL 500** is developed for use for all kind of jobs.

A typical task would be to pull trolleys at hospitals, airports or at storehouses.

The tractors are suitable for transporting goods or persons over long distances.

**TL 500** is 3-or 4-wheeled and pulls at both rear wheels.

They tractors have a differential gear between the two pulling wheels and the motor and transistor unit is AC. Suspended truck-seats are standard.

**TL 500** has a very low height above the floor – a great advantage when getting in or out of the vehicle.

**TL 500** can be tailor-made as desired, with 2 seats, driver's cabin etc.

### **Tecnical specifications, TL 500:**

*Total length:* 1800 mm  
*Total width:* 800 mm  
*Turning diameter:* 2600 mm  
*Tractive effort:* 4000 N  
*Weight, incl. batteries:* 800 kg  
*Chassis:* 100x50x5 RHS. Plate iron 2 mm.  
*Motor:* 24 v, 3,2 kW AC  
*Battery:* 24v, 240ahp or as desired  
*Wheels:* 400\*8 8pr.

Hydraulic brakes.

Electrical system: transistor with gas pedal.

Magnetic parking brake.
